

The Smart Solution for Industrial Machines and System Integration

Automation for a Changing World

Delta Programmable Logic Controller AH500 Series

www.deltaww.com

AH - Automation System for High-level Applications

The new generation AH Series PLC provides automation solutions for high-level applications. The combination of modularized hardware structure, advanced functions, and the highly integrated software provides a system solution for process control applications. In addition to various function blocks, excellent price/performance, and an abundant selection of extension modules, the AH Series PLC also provides exceptional system expandability, greatly reducing the system cost for a broad range of applications.

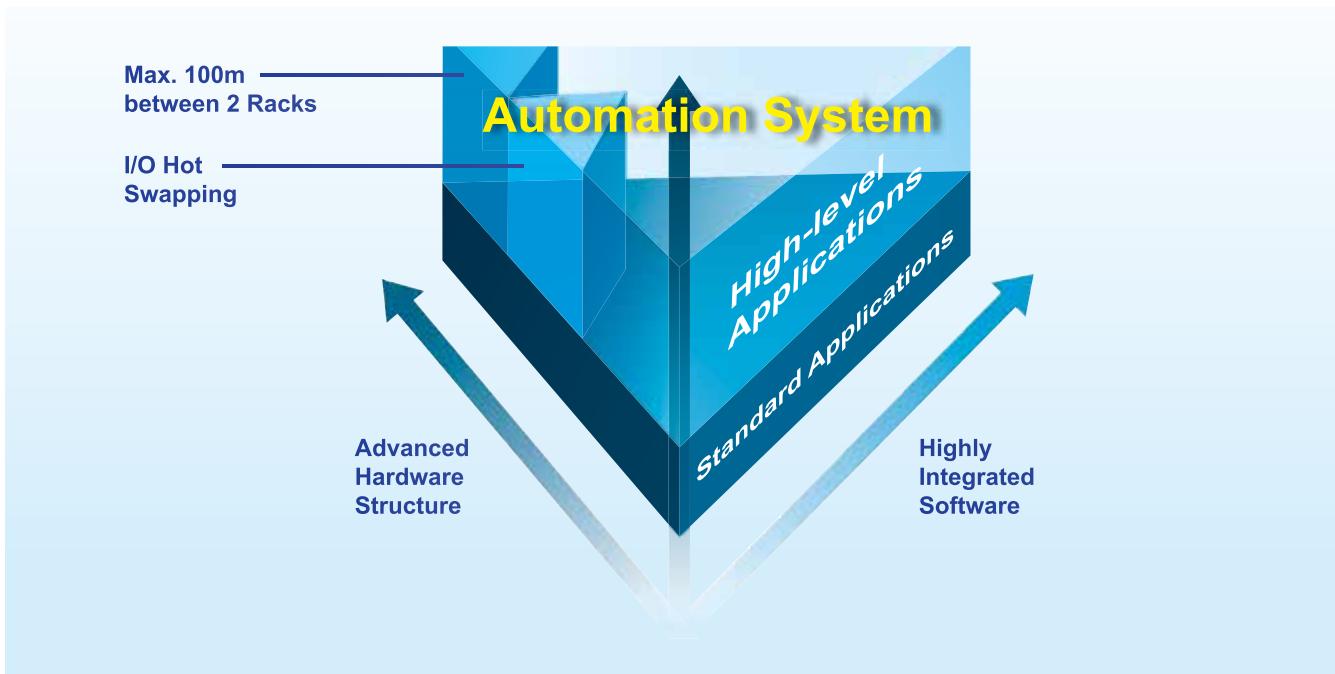

AH500 Series

- » Highly integrated software ISPSoft: graphical interface with 5 programming languages
- » Enhanced flexibility: Max. 100m between 2 local extension racks
- » Hot-swapping function keeps the system running for improved maintainability
- » Reliable operations of the supported modules in severe conditions
 - < Operating condition: -20~60°C / 5~95% (No condensation)
 - < Storage condition: -40~70°C / 5~95% (No condensation)

- Utilizes a dual-core multi-tasking processor
- Max. I/O points:
 - DIO: Max. 4,352 points
 - AI0: Max. 544 channels
- Program capacity: Max. 256K steps
Data register: 64K words
- Excellent program execution speed:
LD instruction execution speed: 0.1µs
- CPU built-in with fully isolated
RS-232/422/485, Mini-USB, Ethernet,
SD Card 1.0
- Abundant selection of DIO modules,
AI0 modules, temperature measurement
modules, network modules, pulse-train
modules and DMCNET motion control
modules.

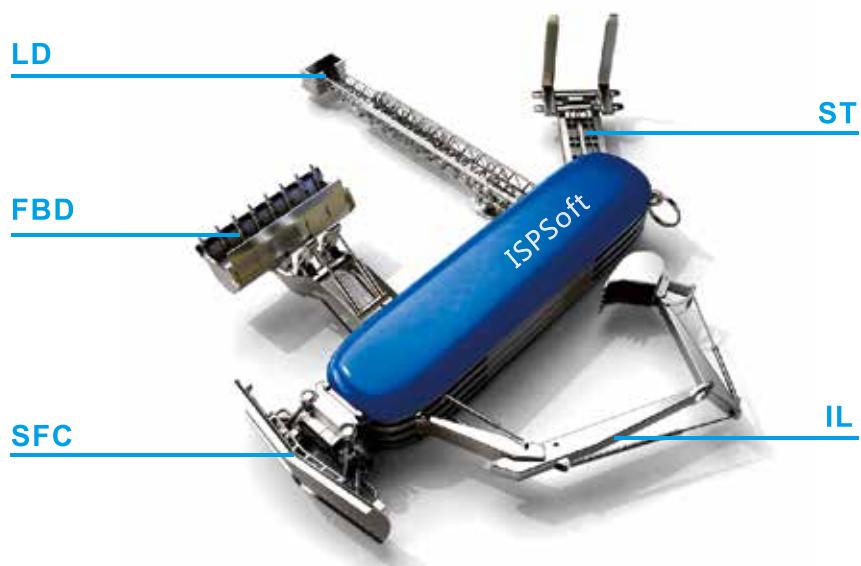

AH500 Series PLC – Automation System with Fully Integrated Hardware and Software Interfaces

Highly Integrated Software – Excellent Accessibility

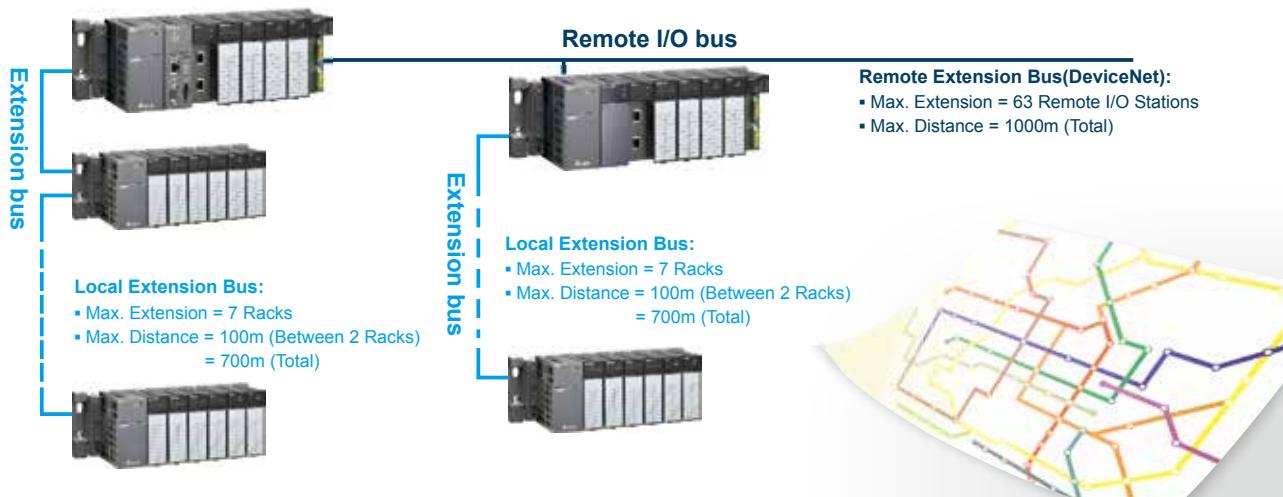

AH500 series PLCs adopt the highly accessible programming software ISPSoft, integrating the main functions that include control process programming, hardware configuration, network configuration, and providing a graphical interface for these functions. In addition, users of ISPSoft can choose their most efficient programming tools from the 5 supported languages: Ladder Diagram (LD), Function Block Diagram (FBD), Sequential Function Chart (SFC), Instruction List (IL) and Structured Text (ST).

Enhanced Flexibility – Extends the System Freely

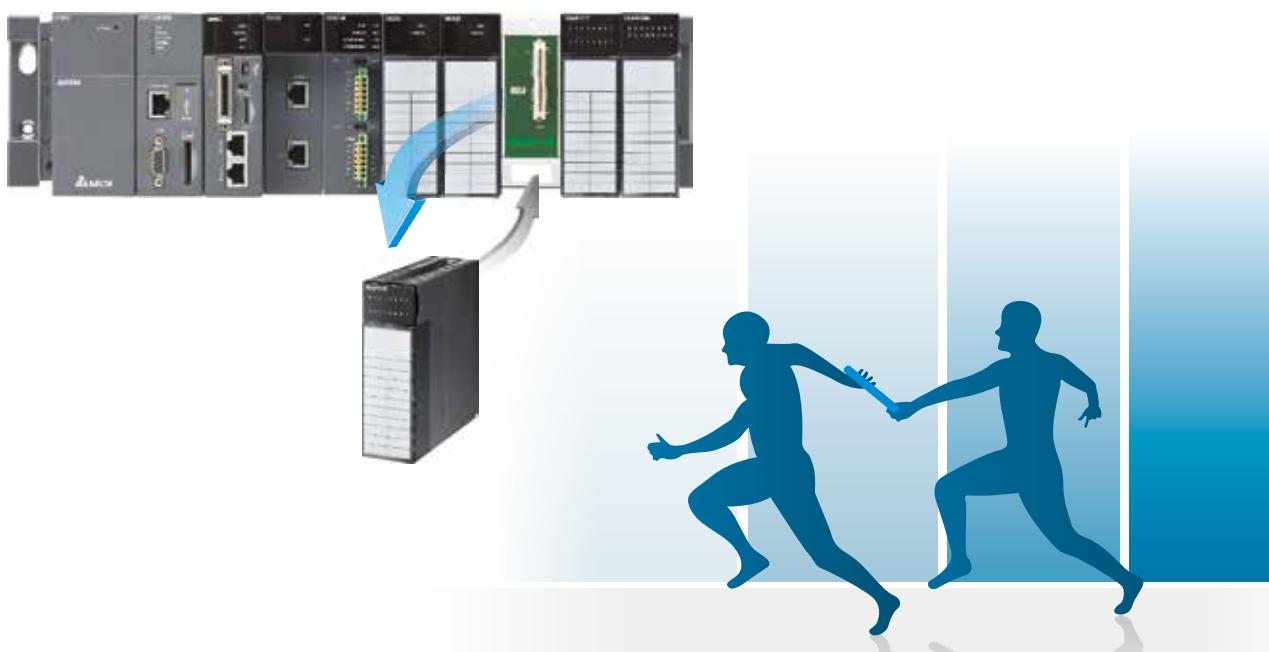

The length of extension cables between each AH500 local extension rack can reach a maximum of 100m, greatly enhancing wiring flexibility. In addition, the AH500 provides modularized backplanes and modules applicable for not only CPU racks but also for remote I/O racks. This feature improves the flexibility of system planning and reduces the additional cost that might be generated by preparing two different types of spare backplanes and modules.

System Extension Structure

Improved Maintainability – Keeps the System Running

The hot-swap function provided for AIO and DIO modules increases maintainability when I/O modules fail. Users can replace modules without stopping the operation of the CPU module, preventing a possible loss due to a pause in the system's operation.

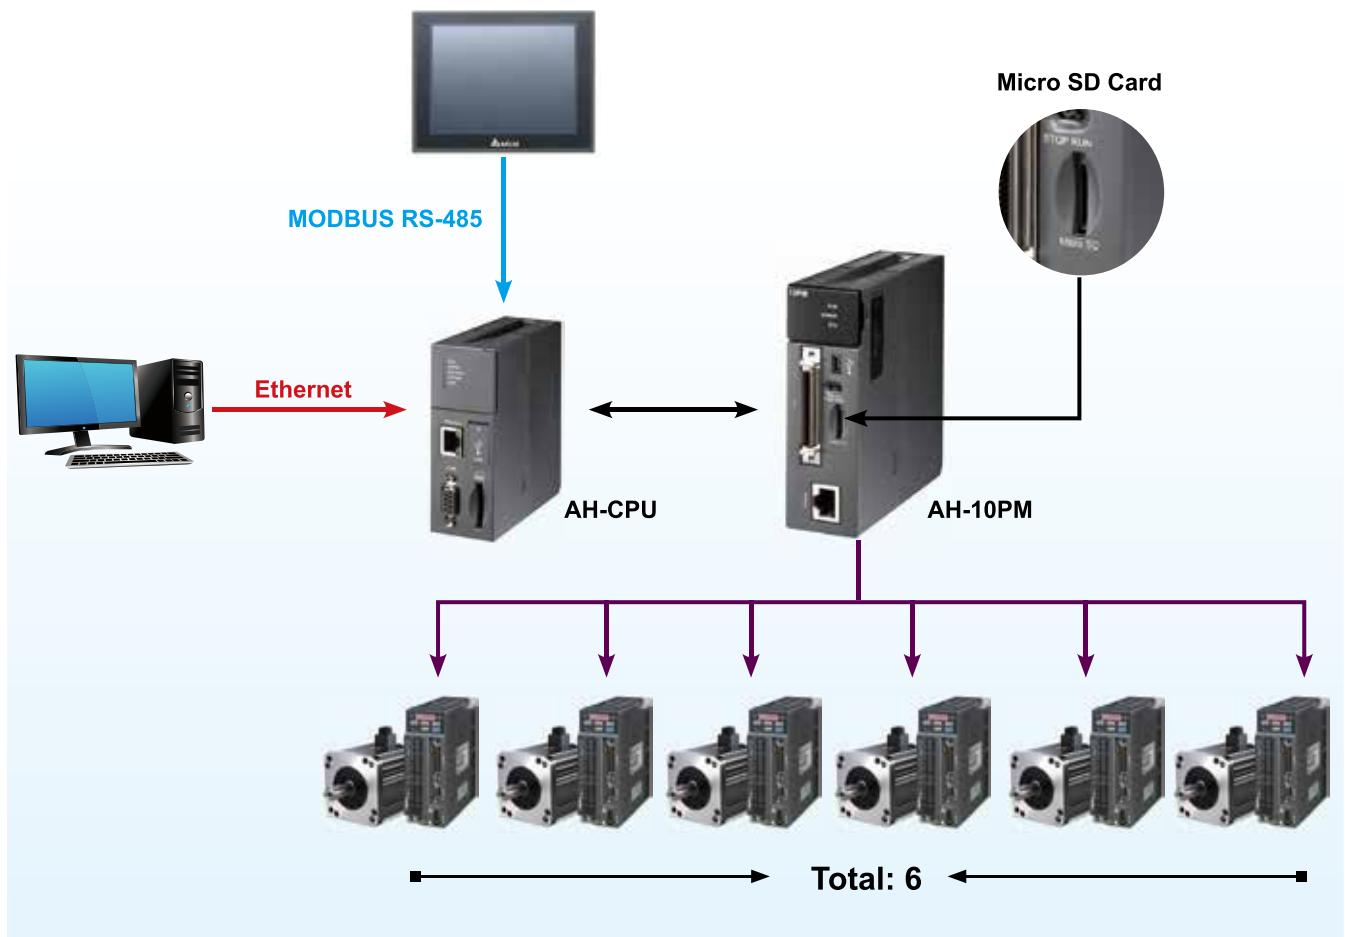

Motion Control Platform for Convenient Multi-axes Applications

Pulse train motion control module AH05PM/AH10PM

- ▶ AH05PM/AH10PM is designed to perform independent operations. It features a built-in CPU for programming and execution that greatly improves control efficiency.
- ▶ Execution speed: LD instruction @0.13μs
- ▶ Capacity: 64K steps
- ▶ Data register: D=10K words / W=64K words
- ▶ Motion Control Functions
 - > Controllable axis: 2 axes (AH05PM) / 6 axes (AH10PM)
 - > Supports UD/PD/AB/4AB modes and 1M Hz output
 - > Supports MPG inputs/E-Cam/G-code/2~6 axes linear interpolation/ 2 axes arc interpolation/3 axes helical interpolation (AH10PM)

MODBUS RS-485 System Control Structure

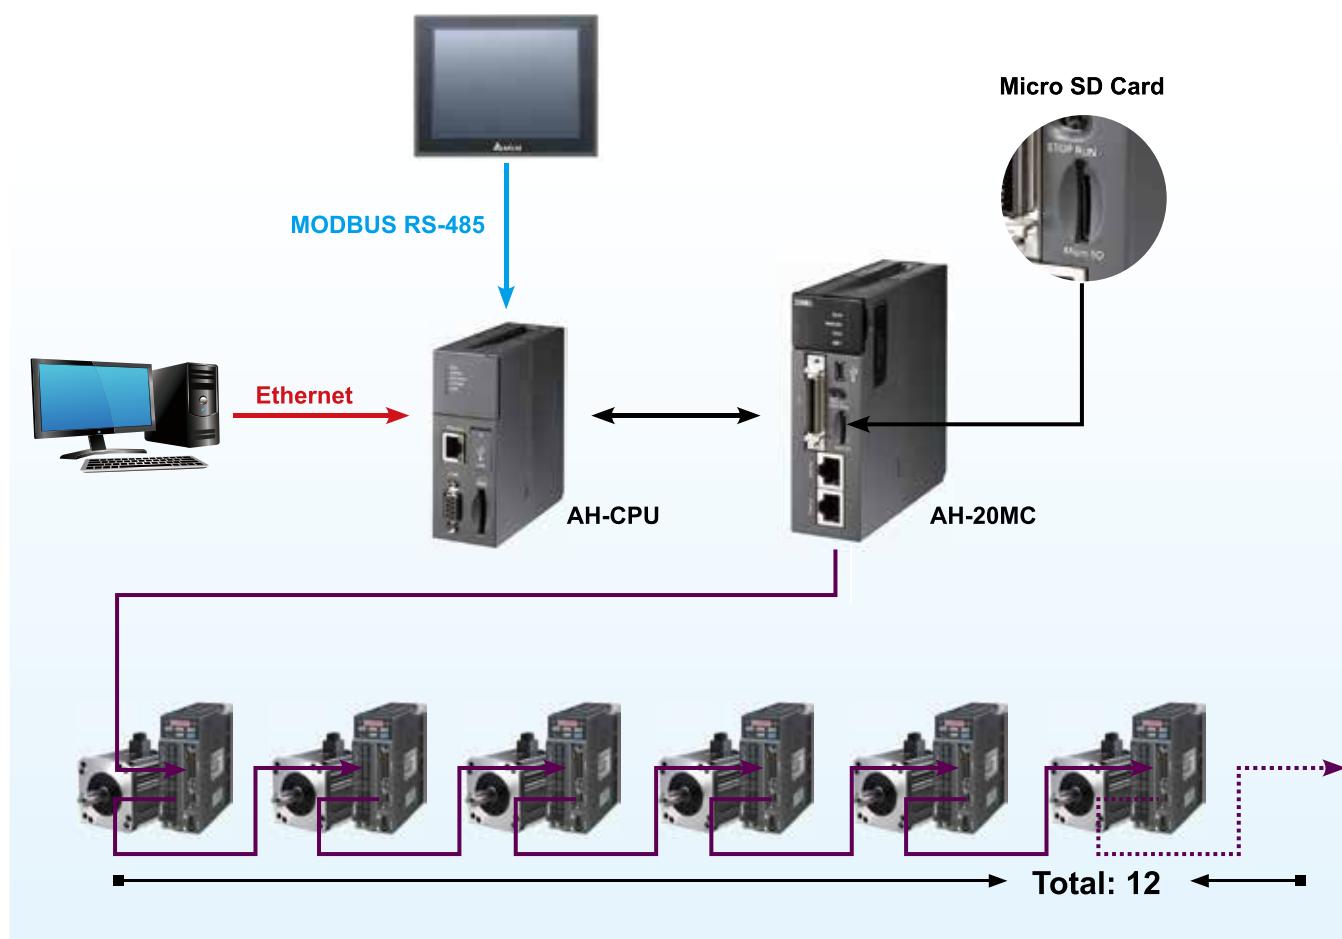

DMCNET communication motion control module AH20MC

- ▶ AH20MC is designed to perform independent operations. It features a built-in CPU for programming and execution that greatly improves control efficiency.
- ▶ Execution speed: LD instruction @0.13 μ s
- ▶ Capacity: 64K steps
- ▶ Data register: D=10K words / W=64K words
- ▶ Motion Control Functions
 - > Controllable axis: 12 axes
 - > Synchronous time: 12 axes @1ms
 - > Supports MPG inputs/E-Cam/G-code/2~6 axes linear interpolation/ 2 axes arc interpolation/3 axes helical interpolation

MODBUS RS-485 System Control Structure

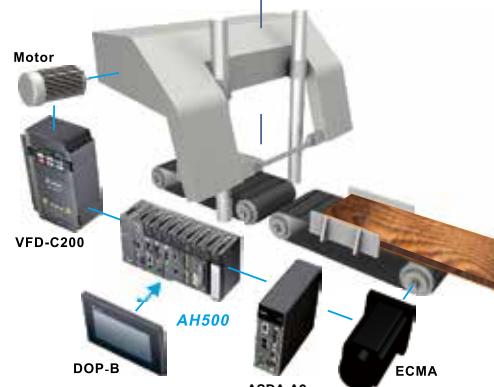

Application Examples

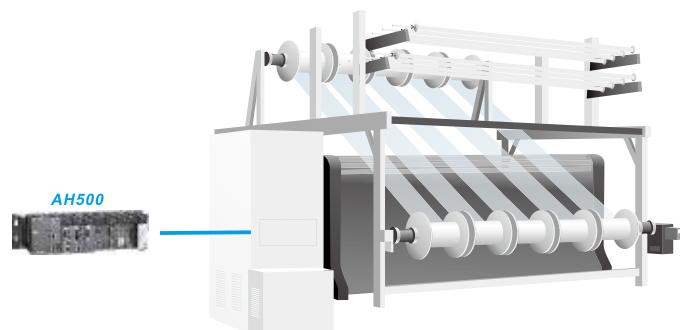

Large Scale Industrial Machines

The features of the AH500 can easily fulfill the system requirements of large scale industrial machines. By utilizing its unique local extension capability with versatile combinations of I/O modules, the AH500 can simplify the complex remote I/O system structure in large scale industrial machines with a local I/O system consisting of a single CPU rack and local extension racks, maintaining a high execution speed and lowering the wiring cost.

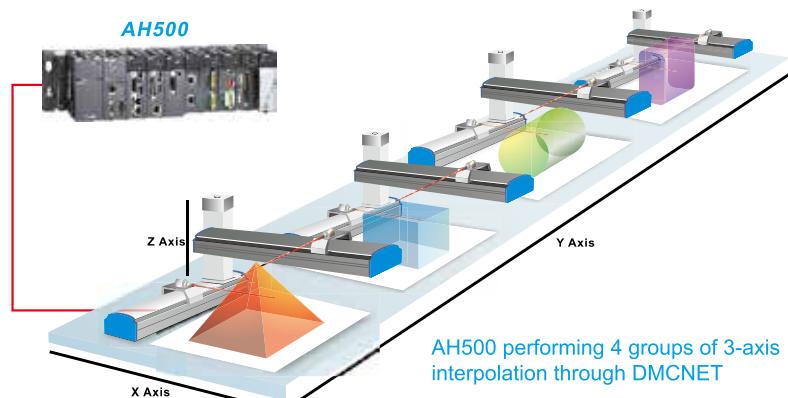

Building Material Processor

Warp Knitting Machine

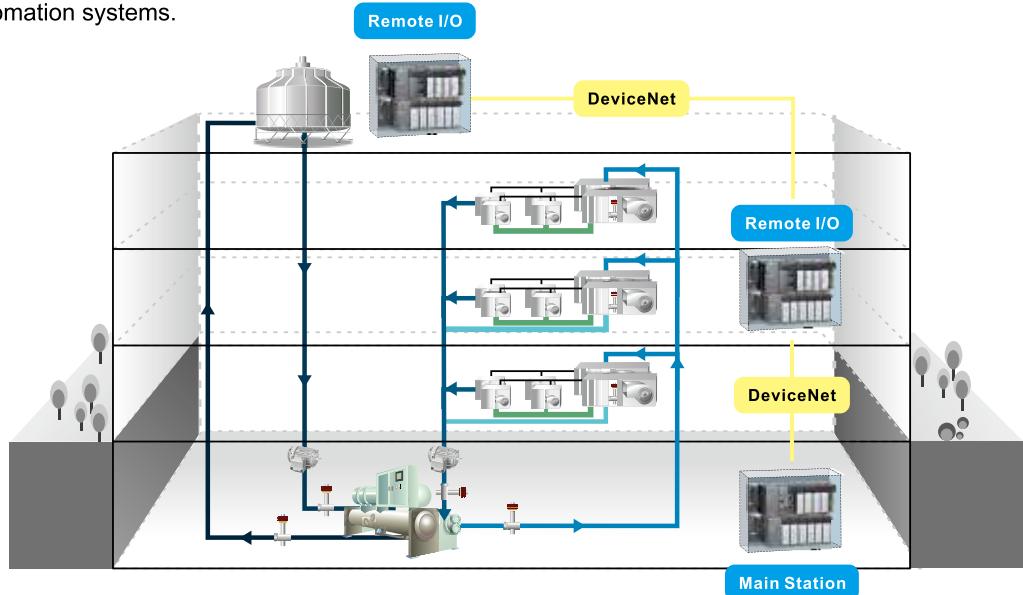

The AH500 also supports excellent motion control functions including 3-axis linear interpolation, 2-axis arc interpolation, and 3-axis helical interpolation. In addition, the AH500 is capable of controlling up to 12 axes or 4 groups of 3-axis interpolation synchronously through Delta's high speed motion control network DMCNET.

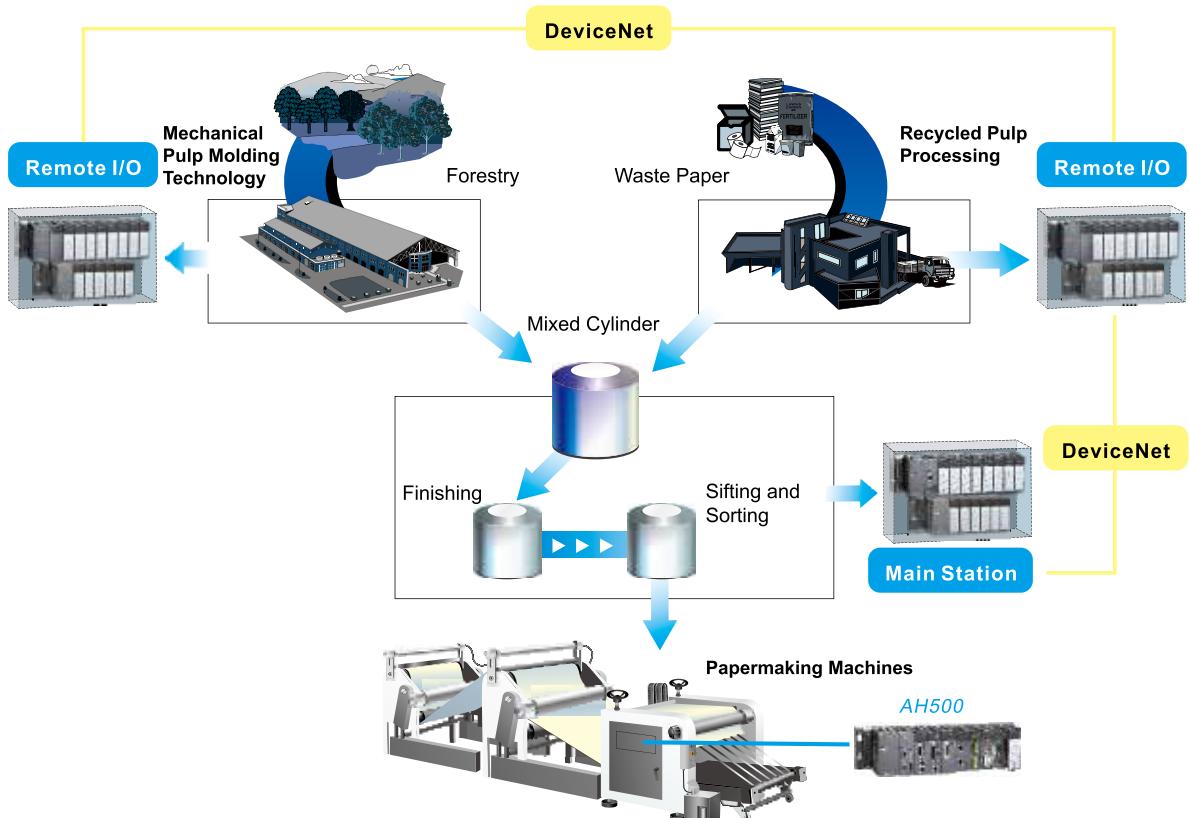

System Applications

The AH500 is a modular system controller designed for almost all kinds of high-level automation tasks. The abundant selection of I/O modules and the flexible system structure provide best solutions for all types of system integration requirements. Through the remote I/O expandability, you can build up the AH500 main station as a central control system and allocate the remote I/O systems on different floors for HVAC applications, or in different processing stations for the paper-making industry. The AH500 can not only fulfill the application requirements of industrial machines or devices, but it can also provide total solutions for automation systems.

HVAC

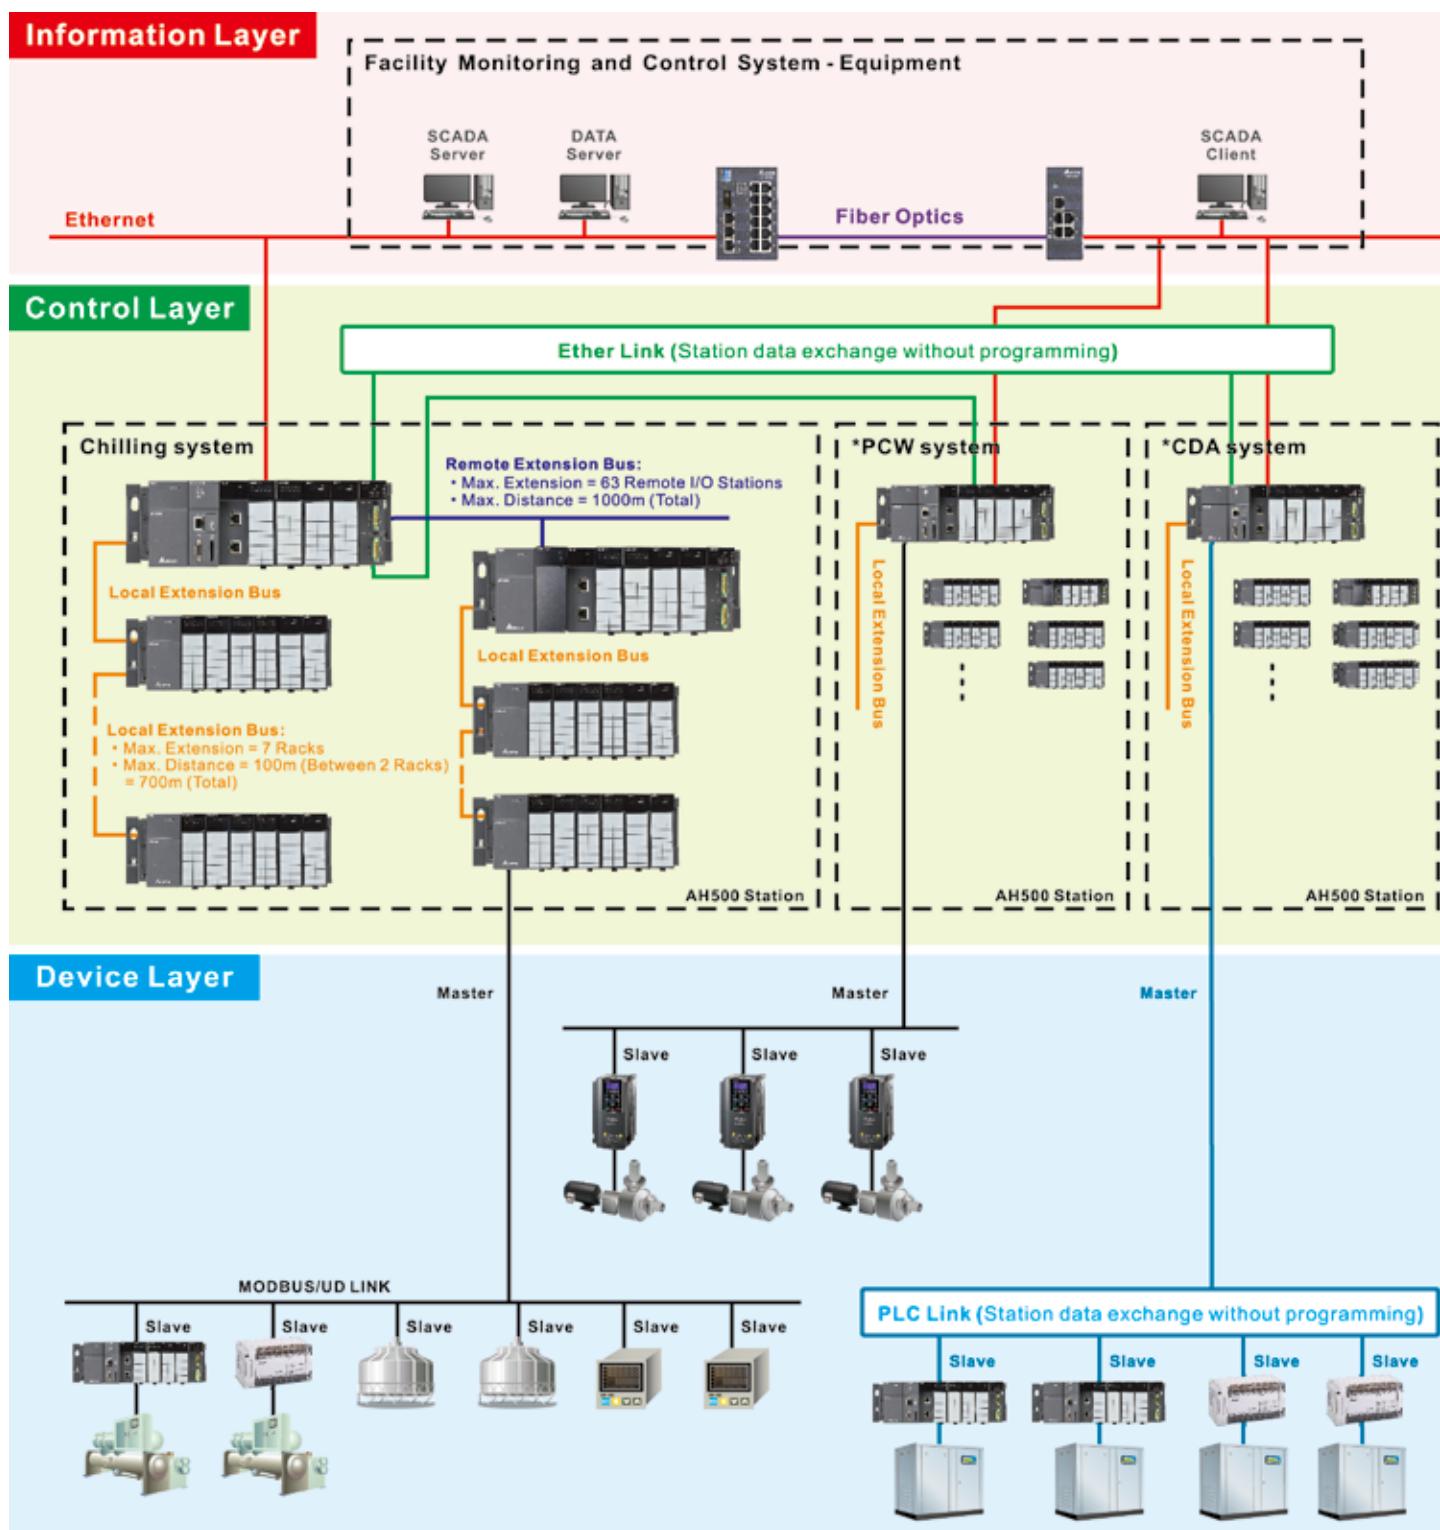

Papermaking Industries

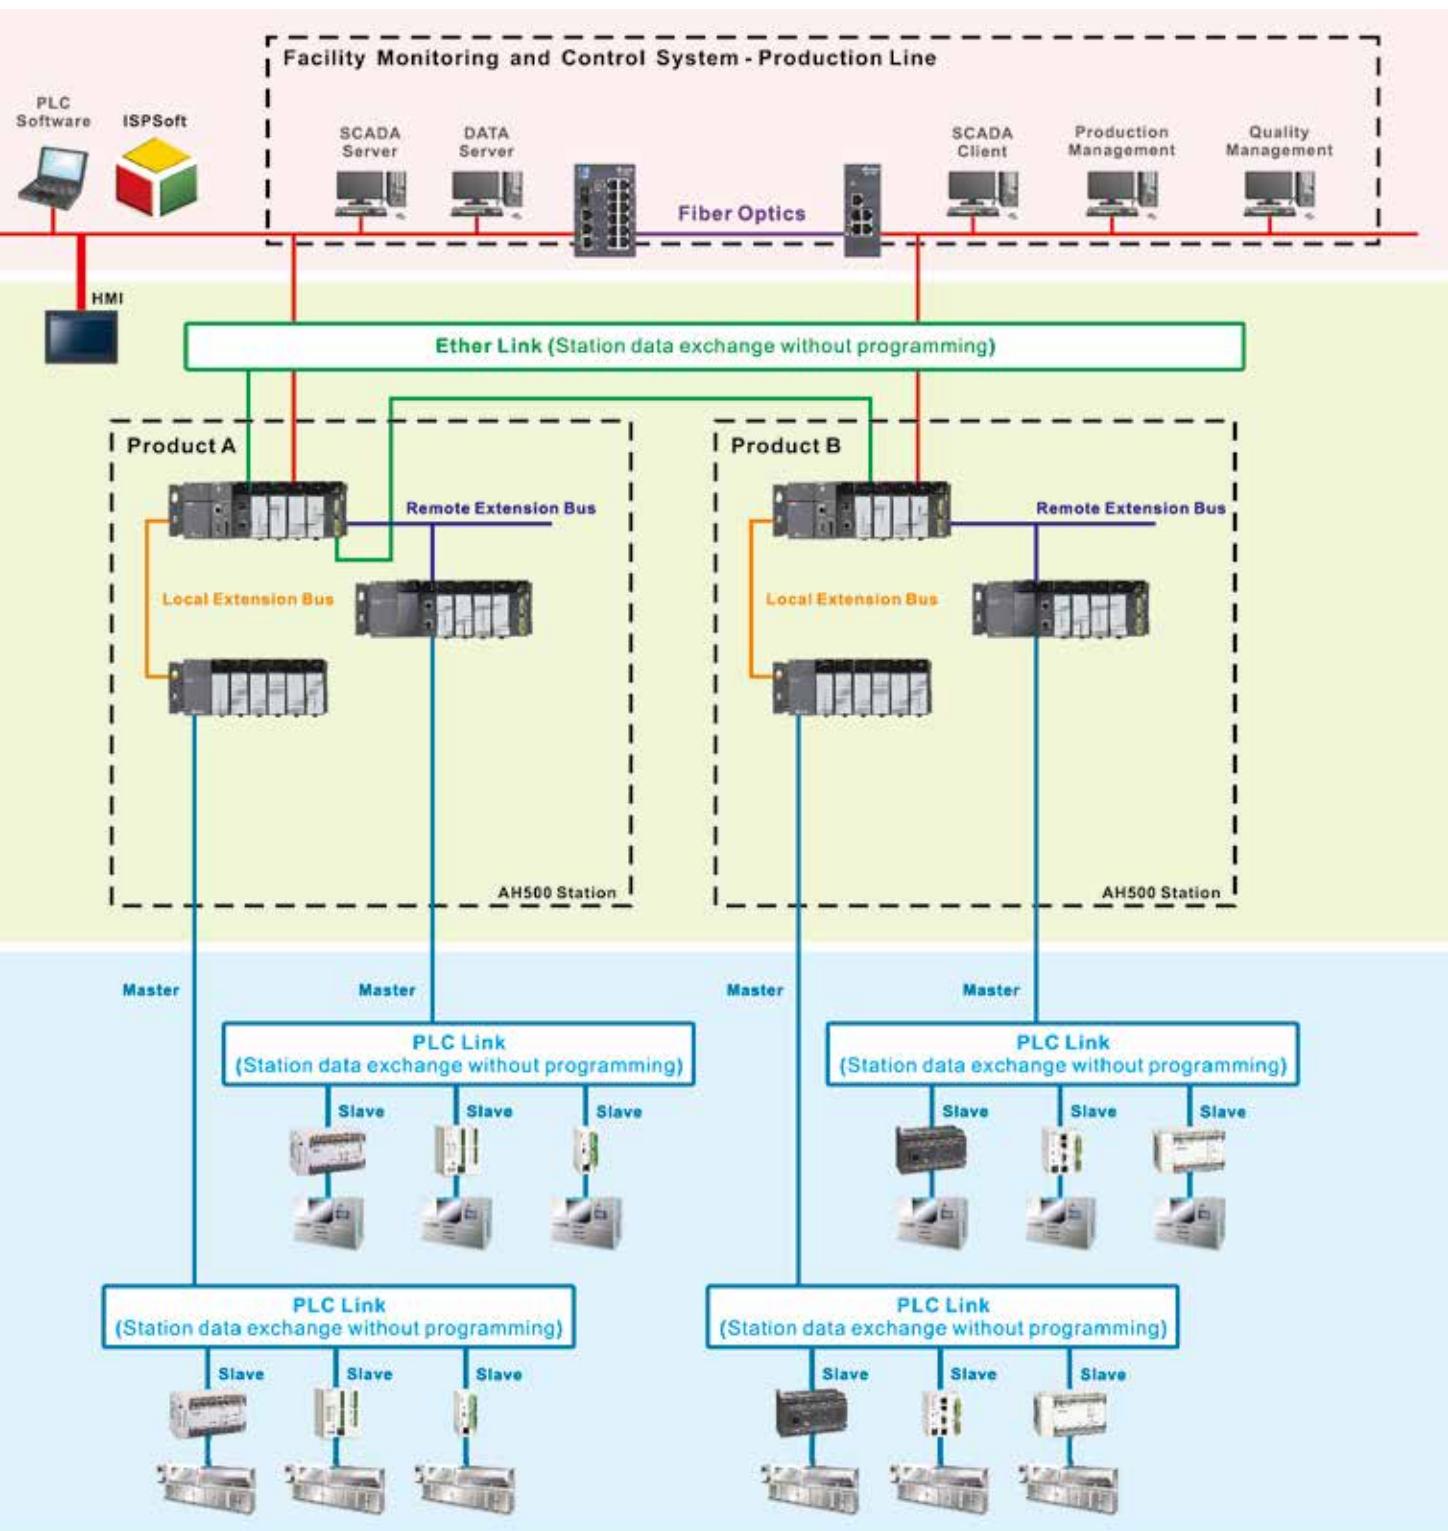

AH500 System Structure – Facility Monitoring and Control System

The system configuration of the AH500 is well demonstrated by the Facility Monitoring and Control System (FMCS).

The AH500 in the control layer connects multiple facility systems and product processing systems and performs data exchange without programming through Delta's convenient PLC Link and Ether Link. PLC Link can be applied for data exchange between masters and slaves, and Ether Link can be applied for data exchange between AH500 master stations. The smart communication feature can save you time spent in programming.

In addition to AH500 PLCs, Delta's industrial automation solution includes human machine interfaces (HMI), DVS series industrial Ethernet switches, DVP series PLCs, AC motor drives, AC servo drives and temperature controllers. You can find the best solution for your industry from our product lines across device layer, control layer and information layer.

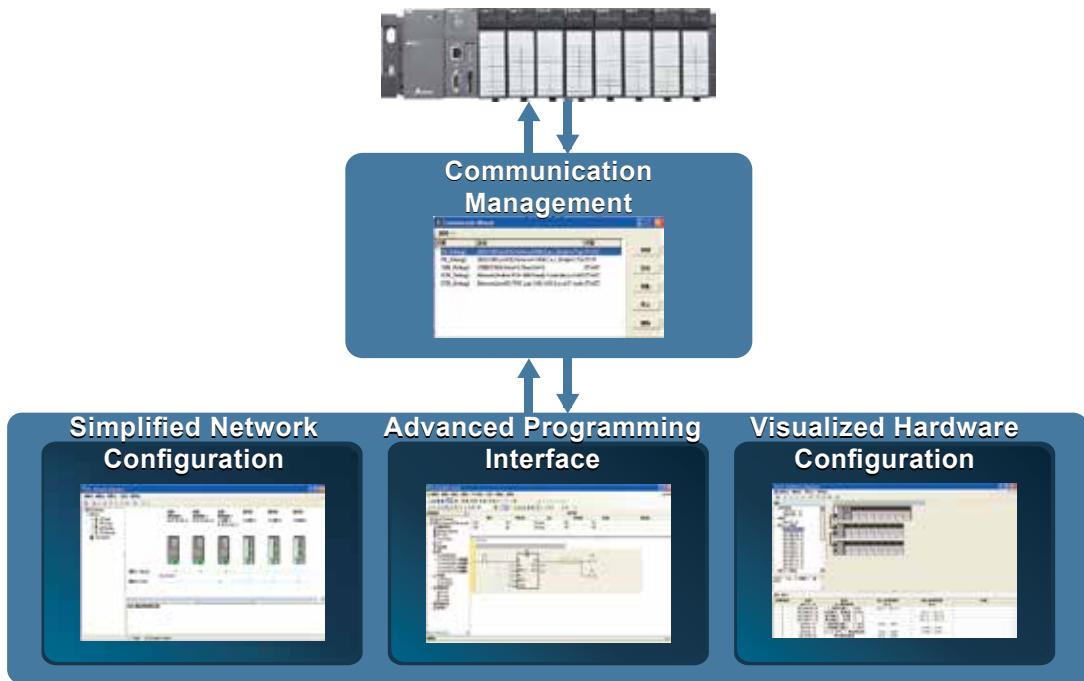

ISPSofT V2.0

Highly Accessible Programming Software

Fully Integrated Interface

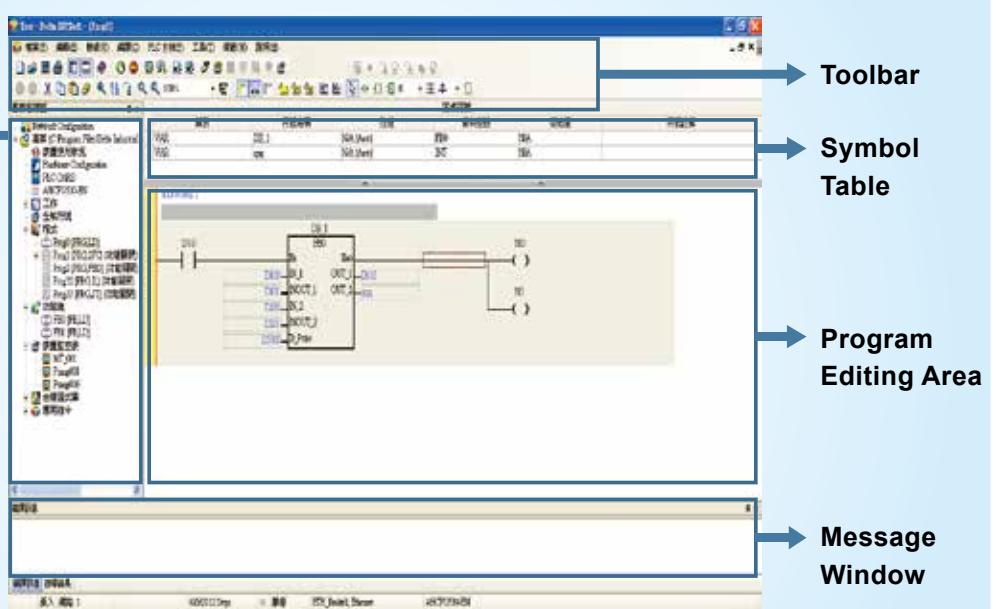

Advanced Programming Interface + Visualized Hardware Configuration + Simplified Network Configuration

Advanced Programming Interface

Project Management Window

- New functions: Network configuration, hardware configuration and PLC card.
- Supports 5 programming languages (LD/FBD/SFC/IL/ST) in both main program and FB.
- **Function Blocks:** Symbols can be introduced in call-by-value or call-by-reference types. Function blocks can be called in function block for up to 32 levels.
- **Monitor Table:** It can be stored and managed separately. Multiple monitor tables can be stored in a single project.
- **Delta Library:** Users can design frequently used instructions for specific applications in different industries.
- **Task:** Supports external interrupts and timer interrupts.

Visualized Hardware Configuration

Module Selection

Module Description

Toolbar

- System hardware configuration can be monitored in On-Line mode
- Hardware configuration can be displayed by Scan function

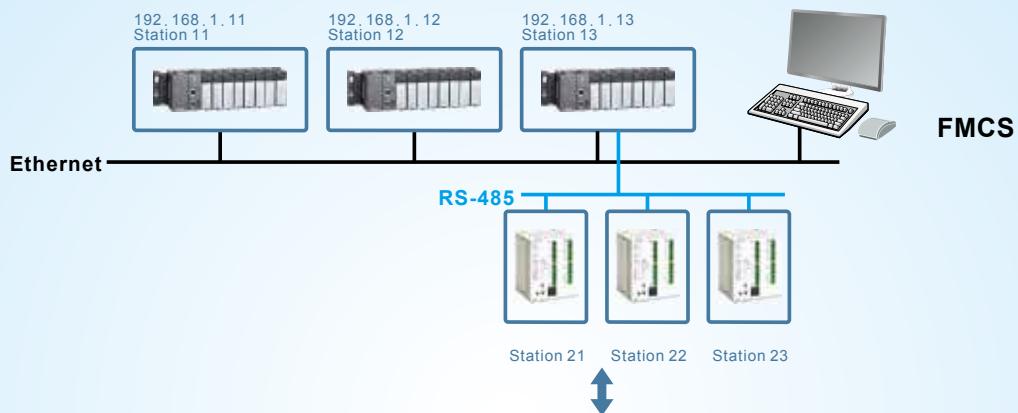

Hardware Configuration Area

- Operations of Cut/Copy/Paste/Delete are available for modules and racks
- Parameters of each module can be directly configured

Rack Information

- I/O device range can be specified by the user

Simplified Network Configuration

Network Device Selection

Ether Link

PLC Link

Toolbar

Network Configuration Area

- Master device settings
- Ether Link editing function
- PLC Link editing function

Network Information

PMSoft V2.0

This programming software is for G-code editing, motion trajectory simulation, positioning route instruction and electronic cam establishment.

Variable Declaration

Separate from the program. The corresponding physical I/O point of the variable is defined only after the program is compiled. Users do not need to modify the program.

Function Block

A complicated project can be divided into many function blocks. A function block can be used repeatedly. The import/export function makes the programming more convenient.

Function Block for Motion Control

Provides function block features specifically for motion control, making programming more convenient

Convenient Monitor Table Management

Users can save and manage monitor tables independently according to their needs.

Electronic Cam

Electronic cam editing
